

NOTHING SEALS BETTER.

**AUTOMATED DOOR SOLUTIONS DESIGNED
FOR ALL COLD STORAGE ENVIRONMENTS**

PROUDLY MADE IN U.S.A.

COLD STORAGE DOORS

- 3-LAYERS OF FABRIC
- TWO CONTINUOUS SEALS
- IMPACT RESISTANT DESIGN

The RollSeal Door System is a custom solution for your cold storage door needs. The three layers of fabric create a dead air space further separating your environments. Our patented sealing technology eliminates air infiltration by creating two continuous seals along both sides of the door on the front and back panels. RollSeal has no standard maintenance schedule with its impact resistant design.

Model (RS-500 & RS-600) Comparison

RS-500 Cooler Doors

Sizes: Up To 13' Wide x 14' Tall

Speed (Brother): Up to 18" per Second

RS-600 Cooler Doors

Size: Up To 24' Wide x 24' Tall

Speed (Brother): Up to 48" per Second

Additional Features (on both doors):

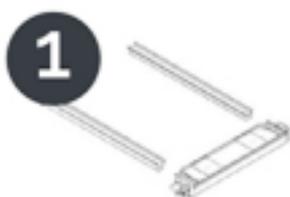

- Patented Sealing Technology
- Impact Resistant Design
- Reduces Operational Footprint
- New Construction or Retro-Fit
- Aluminum & Stainless Options

Easy Installation

Compact design and easy 3-step installation simplifies upgrades to existing walk-ins and implementation into new construction.

STEP 1 - Placement

Slide tracks into header, bolt in place, plug in safety beams.

STEP 2 - Stand Up & Mount

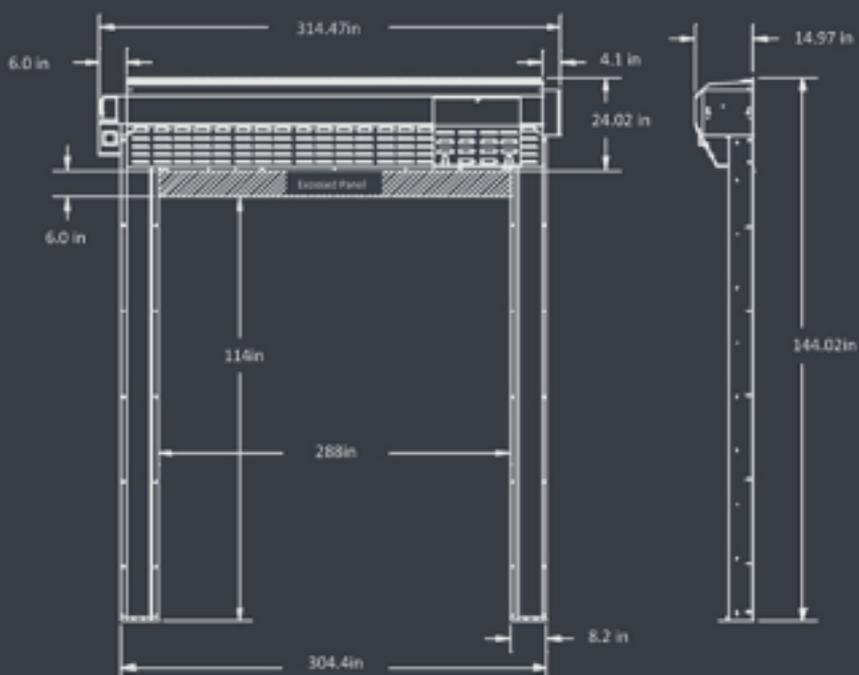

Stand up in opening, square tracks to header and attach to wall and floor with appropriate fasteners.

STEP 3 - Electrical

Mount controller, plug in motor and signal connectors, wire to local power and run set-up program.

AUTOMATED DOOR SOLUTIONS

*When seal is more important
than speed and you need to
keep what is inside in and
what is outside out.*
